

Prescription Support Program

Are your employees overpaying for their prescriptions? Would you even know if they were? Let us help!

Case Study (Example Employee)

John is 45 year old yard worker at his lumber company. He has employee only health benefits through the most popular local carrier. John has high blood pressure and has recently been moved from generic lisinopril to a branded beta blocker.

Example Branded Beta Blocker Formulary Facts

Cash Price: \$170

Formulary Status: Tier 4

Copay: could vary between \$40 – full cash price depending on plan structure

Block Insurance Prescription Support Program

Step 1 – Does John potentially qualify for the manufacturer’s patient assistance program based on their yearly income?

Yes – John could receive his branded medication at ZERO COST.

No – Proceed to step 2.

Step 2 – John has commercial insurance through his employer and is eligible to participate in a savings program provided by the manufacturer. John works with Block Insurance to identify and register for the program.

Step 3 – With an activated program card, John takes his new, branded prescription to his local pharmacy. With the program savings, John can access a 90-day prescription for as little as \$15 per fill.

Money is tight. Finding the best employees is hard. Let us help you stand out by putting money back in your employees pockets each month
